

CARL STRINGER

Carl Stringer is Chief Information Officer for United States Sugar Corporation. His primary duty is to lead the Information Technology department including, application development, infrastructure management, desktop support, communications and corporate printing. Mr. Stringer joined US Sugar in June of 2004.

Carl was previously a member of the Ryder System Inc. senior IT team at their HQ in Miami for 2 years and prior to that worked for Accenture 5 years in their Solutions Operations business unit. His primary role at Accenture was in IT management for the Ryder account.

Carl originates from the United Kingdom where he held several IT positions in British Aerospace (BAe), Military Aircraft Division. Carl's primary role at BAe was leading the Dynamic Software Rig team in designing aircraft subsystem simulations in order to test mission computer software routines for the Hawk series light fighter aircraft.

Carl holds various certifications in application development, system administration and management studies and has an Honors degree in Electrical and Electronic Engineering from Northumbria University in England.
